

Eduardo Ezponda Igea

eduardoezpondaigea@gmail.com | eduardoezpondaigea.com | Madrid, Spain | 04/03/2003

PROFILE

- **AI Engineer** developing **production machine learning systems** using Python, SQL, and cloud-based data infrastructure.
- Applied Data Science background with end-to-end machine learning project experience, combined with strong software engineering foundations in backend APIs, automated testing, and **system design**.
- Certified across the AI and cloud stack (Anthropic, AWS, IBM), applying **agentic workflows** and AI-native tooling to increase execution speed and focus on business impact.

WORK EXPERIENCE

AI Engineer at Management Solutions

Jul 2025 – Present

Madrid, Spain

- Embedded at BBVA through Management Solutions, a global consulting firm, within one of the world's top 15 banks by assets
- Designed and implemented credit scoring models, owning the end-to-end ML lifecycle from EDA and feature engineering to model validation and deployment on AWS (SageMaker); built agentic AI workflows and RAG-based systems to automate analytical tasks and adapt system complexity to business needs
- Performed large-scale data analysis using SQL and PySpark, extracting features, diagnosing data quality issues, and supporting model calibration under strict risk governance standards.
- Translated business requirements from product owners and risk teams into technical specifications, communicating model outputs back to non-technical stakeholders.

Junior Software Developer at Splorotech

Sep 2024 – Dec 2024

Pamplona, Spain

- Owned backend adaptations for Kronis, a startup-built knowledge and project management platform, during its frontend migration from Django to Next.js, restructuring API responses to align with the new architecture.
- Developed a web interface to interact with the API and implemented unit tests to validate correctness throughout the migration process.
- Set up the local development environment using Docker, configuring PostgreSQL and Redis containers to support testing and deployment workflows.

Junior Systems Assistant at CYC

Jun 2024 – Aug 2024

Pamplona, Spain

- CYC is a Spanish technology consultancy specialised in digital transformation and data analytics, Microsoft Gold Partner with 30 years of experience.
- Worked in systems and IT operations, gaining hands-on exposure to infrastructure management in a consulting environment.
- Built advanced Excel solutions including VBA macros, automated reporting workflows, and pivot table dashboards to improve operational efficiency across internal and client-facing processes.

EDUCATION

University of Navarre (UPNA)

Sep 2021 – Jun 2025

Bachelor's Degree in Computer Science (International Program)

- **GPA: 7,43/10**
- **Relevant Coursework:** Mathematics II, Statistics, Data Structures, Databases II, Artificial Intelligence

Laurea University of Applied Sciences

Jan 2025 – Jun 2025

Exchange Semester in Helsinki, Finland

- **Relevant Coursework:** AWS Cloud, Data-Driven Decision Making, Software Testing

Zrive Applied Data Science

Jan 2025 – Apr 2025

Data Science

- A 15-week intensive program designed for high-performing university students and young professionals who want to launch their careers as Data Scientists.
- **Relevant Modules:** Exploratory Data Analysis, Fundamental of Statistical Learning, Optimal Model Fitting, Model Analysis, Business Translation, System Design

Nuestra Señora del Huerto High School

Sep 2019 – Jun 2021

Technological Baccalaureate

- **GPA: 8.82/10 | University Entrance Examination: 12.24/14**
- **Specialization:** Mathematics, Physics, Technical Drawing, Chemistry

CERTIFICATIONS

- **Anthropic: Claude Code & Agentic Systems (Mar 2026):** Three official certifications covering subagent architecture, multi-agent orchestration, tool use and skill design, applied agentic workflows, advanced prompting, memory management, and pre/post hooks.
- **AWS Cloud Practitioner (Jan 2026):** Official AWS certification covering cloud services, architecture, and infrastructure fundamentals.
- **IBM Data Science Professional Certificate (2025):** 12-course, 160h program covering Python, Machine Learning, Data Visualization, and Generative AI, completed within 5 months.
- **Stock Market and Value Investing (Jun 2024):** 3-week intensive seminar at Universidad Francisco Marroquín, conducted by Gustavo Martínez, José Ruiz de Alda, and Juan Luis Fresneda, three of Spain's most respected value investors. Covered macroeconomics, financial markets, fundamental and accounting analysis, sector analysis (cyclical, holding, and growth companies), competitive advantages, derivatives, short selling, and corporate operations.

TECHNICAL SKILLS

- **AI / ML:** Python (scikit-learn, XGBoost, pandas, NumPy), feature engineering, model evaluation, agentic workflows, RAG systems
- **Data:** SQL, PySpark, EDA, data pipelines, data quality and governance
- **Cloud:** AWS (SageMaker, Athena, QuickSight, S3)
- **Engineering:** Git, CI/CD, unit testing, system design, and software best practices; Django REST Framework, Docker
- **Automation:** Excel (macros, pivot tables, advanced formulas, automated reporting)
- **Languages:** Spanish (native), English (C1 Cambridge), French (B1)
